Attention: Dr. Bijaya Adhikari, Science and Regulatory Coordinator

**Re: N7L1-1787 2016 Environmental Site Monitoring Report**

Dr. Adhikari,

MGM Energy (“MGM”) will be conducting additional sump monitoring in 2017 as outlined in our 2016 Environmental Site Monitoring Report. As outlined in the Inuvialuit Water Board’s correspondence of May 4, MGM did not provide results based upon electromagnetic induction. MGM conducted a monitoring and sampling program, and based upon those results designed the 2017 program.

It is the opinion of MGM that the 2017 program will yield better monitoring results than electromagnetic induction, specifically conducting the drone survey and the shallow borehole program will provide additional information for both MGM and regulators on the condition of the sump.

If you have any questions regarding the above or enclosed please do not hesitate to contact the undersigned via e-mail at [terence.hughes@paramountres.com](mailto:terence.hughes@paramountres.com) or via phone at 403-206-3859.

Respectfully,  
MGM Energy

Terence Hughes  
Regulatory and Community Affairs Representative
