July 11, 2017

Mardy Semmler
Executive Director
Inuvialuit Water Board, Inuvik NT

Dear Mardy,

Imperial is committed to completing its cleanup of the Tununuk Point / Bar-C site in summer 2017. On June 14-16 we mobilized to site with a local work crew, trekked over 94 kms with handheld GPS units and removed 52 bags of scattered debris. Remaining larger pieces were photographed and geo-tagged for removal later in the summer. In late July, we'll be returning to site to complete debris removal, recontour remaining clean soil piles and finish the soil remediation program. The work on site will be substantially complete in 2017, however Imperial will continue to meet its ongoing commitments as required in the approved Monitoring Plan. We look forward to continuing our work with the IWB and completing the project to the highest standards.

Sincerely,

A handwritten signature in blue ink, appearing to read "Tobiah Newton".
